

Step-by-Step Financing Made Easy With CLP

Here for every step!

We know that the financing process can be overwhelming. Let the experts at Community Leasing Partners (CLP) help you along the way! With our step-by-step guide, we will take the guess-work out of the financing process and make sure that you know exactly what to expect with each phase of financing.

Step One: Request a Quote from CLP

With our lightning-quick response time, you can call, email, text, or submit via our website a request for proposal, and you will receive a quick, same-day response from our team.

Step Two: Acceptance of Quote Proposal

If you decide to accept the provided quote, CLP will send you a simple, one-page application form. The form will request basic information about the project, customer, and financial status of the purchasing entity. Should you have any questions while filling out the application, you may reach out to CLP at any time, and our dedicated staff will assist you.

Step Three: Pre-Approval

After the completed application and requested financials are received by CLP, we will perform an internal credit review. Upon completion and positive outcome of the review, CLP will notify you of your credit approval, and we will notify the vendor for you as well so that they may reach out for final order details.

Step Four: Contract Execution

Community Leasing Partners will provide you an official contract for your final review and approval. You will also be assigned a member of our team to further guide you throughout the contractual process. Once you have approved the contract with the required signatures, you will send it back to CLP.

Step Five: Final Information & Payment

After CLP receives the signed contract back, we will gather any missing information from the customer, and we will reach out to the vendor for the final invoice, MSO/MCOs, serial numbers, wiring instructions, delivery information, etc. Upon the final delivery of the equipment and approval from the customer, CLP will issue payment to the vendor/distributor.

This will conclude the initial financing process; however, **Community Leasing Partners** will still be working for you and answering any questions you have along the way for the **entire term** of your contract. To learn more about our process or to find out how we can help you, **please contact our team today!**
